.....

ABSTRACT: "One who is prolific in his outcomes is the one who is the real hero of the nation". Over the period of time we have seen drastic changes in all the fields and perspectives from techniques to technologies from indies to industries from evolution to revolution but one thing which remains just the same are the efforts and cracks that the people put in making what we seek today unfortunately they don't get the spotlight nor they get sung. These people are not just any people but warriors and real figureheads of our independent nation. In this research we will see the embarking and connecting journey of these flawless unsung warriors who are real pride of our independence and beyond it.

KEYWORDS: Changes, Technology, evolution, spotlight, Independence, Journey

.....

Type of research: **Explorative, Qualitative/Quantitative**

Since the subject is intangible and it is in net instinct of human being
explorative research suits the most.

.....

OBJECTIVES:

Finding the answers on:

- How far has Independence taken us?
- Is Independence really in what we think it is in ?

Methodology:

- Explorative, Qualitative/Quantitative

Result:

- Gradual yet Progressive Changes Leading to the True Independence.
- Right Thinking can Lead to a Revolutionary Change in World.

Contribution to society:

- Spreading the True Meaning of the word 'Independence'.

Chapter 1 – The Fight for Independence and Contribution

It all starts when India was in clutches of British rule, we saw plethora of revolutionary moments, independent acts, that fight, that anger, that emotion, were so lively expressed that the rulers used to fear the Freedom fighters. India was deeply Exploited by the Britishers back then, obviously they had all the new Technology in the World to keep us Indians shut and grounded but they couldn't keep us quite for long because we as a whole Nation were so fueled and pumped with anger that Nobody could stop the Storm coming. And it came indeed! Over 3300 young and raging blood were shed before we got a look high up at our National Flag in the sky. From 1857 to 1947 India was Bashed and was in a very devastated condition but nobody knew that there were many young souls who were ready to sacrifice their lives for the freedom of our Nation. Few were known and others were Anonymous to the cult and to the whole nation.

The Sepoy Mutiny Picture: taken from ThoughtCo.

The Sepoy Mutiny was a violent and very bloody uprising against Britishers in 1857. It is also known by other names: the Indian Mutiny, the Indian Rebellion of 1857, or the Indian Revolt of 1857. In Britain and in the West, it was almost always portrayed as a series of unreasonable and bloodthirsty uprisings spurred by falsehoods about religious insensitivity. In India, it has been viewed quite differently. The events of 1857 have been considered the first outbreak of a rule. The uprising was put down, but the methods employed by the British were so harsh that many in the western world were offended. One common punishment was to tie mutineers to the mouth of a cannon and then fire the cannon, completely obliterating the victim.

Indians faced Racism on a very large extent and people were killed on the daily basis just because they refused to bow before the greedy and thirsty Foreigners. Thousands of brave girls, boys, men and women fought against the oppositions and yet they didn't get the spotlight that they deserved. Huge Contributions were made like the noncooperation in 1919-1922, the civil disobedience movement and the Salt Satyagraha of 1930-1931, and the Quit India movement from about 1940-1942. The main Concern

The Concatenation of Progress

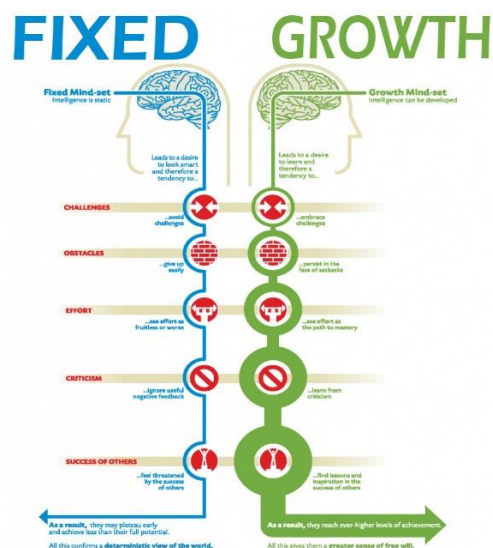

was not how we fought or how we defeated the Darkness but with whom did we defeat them, who were those thousands of young and olds who were martyred during this fight. These are called the Real unsung Heroes and Warriors who Helped us gain Independence. As we know Independence is no dear at any price and freedom is not valued at any cost!

Chapter 2 – Evolution of Mindset

After we got Independence large set of Population was in a dilemma whether to ask someone for help or to live by our own rules cause from many decades we were obliged and to live under the rule of Britishers which somewhere tamed us and limited our Thinking and Socially Connecting abilities as human beings cause we were listening to what we were given to hear so no Brain memory or activity was established in us, we lacked Decision making Power as well as Thinking New Possibilities were also less or equal to none. We remained to be Culturally driven Country but it was just not up to the power or we can say trend as compared to other European Countries who were at that stage where they could take and handle their decisions on their own. illiteracy, corruption, status of women, poverty, gender discrimination, untouchability, regionalism, communalism etc. There are so many problems which were the greater obstacles for the economic growth of India. But by far the biggest was mindset! People were not free to think as an Individual and as a group, social life was awkward and poor and many were not able to still digest that they were free from the British rule.

A mindset is a series of self-perceptions or beliefs people hold about themselves. These determine behavior, outlook and mental attitude. For example, believing you are either 'brave' or 'scared'. Lot of people earlier and today as well don't have the right command over their thoughts and thinking ability which puts them into an impasse. Different people have variety of mindset, some have vivacious thinking ability and others are some sort of in a muddled situation. Progressive persons mindset Constituted of a very modern thinking like girlchild should also learn and get literate, there is no such thing as discrimination and etc.

Chapter 3 – Gradual Changes

India, which has now become an impactful country globally has grown a lot since it got its independence from colonial rule. But just like everything else, different people have different opinions about it slow Despite these contrasting views, the fact that remains is that the India we see today is different than what it was during independence. It has developed in terms of infrastructure, education, healthcare, science and technology, and in almost all other sectors. But still, it is considered a developing nation. This implies that the country is taking its own sweet time to catch up with the developed world. Let us now look at the developments that India has made in different sectors in the past seven decades. There are many factors that are indulged in this rapidly developing India such as Service sector growth, Agriculture sector growth, Industrial Infrastructure growth, Progress in Education Sector as well as in healthcare sector. Not to forget the Scientific Achievements which made vast difference in leading and taking Our nation to the next level.

Idealistic political leadership of post-Independence India started a unique and historically untried and untested experiment of democratic socialism in a low-income economy. This new institutional matrix consisted of a regulatory regime comprising three elements: public sector expansion, discretionary controls over markets and private economic activities, and stringent foreign exchange and import controls. The tightening of the regulatory regime on ideological grounds without regard to its effectiveness in obtaining the socialist goals provoked the basic incompatibility of the three elements of the new institutional matrix with the mixed economy institutional environment. Self-reliance under the influence of the ideology of economic nationalism was wrongly equated with self-sufficiency.

From independence till now for the last 75 years we have seen a gradual yet consistent change in each and every aspect of society, let be in any state, type or region...there is no boundary of expansion for this progressive change.

Chapter 4 – True Independence

Realistically speaking we never as a human got to know the real meaning of the word ‘Independence’. It doesn’t necessarily mean only to be freed from someone’s clutches but it means independence for every being, right to do everything the way that person likes, rights, freedom of speech, freedom of action just not the physical rights but the mental rights too. We have evolved and developed as humans but are we evolved mentally to the level that we need to be at? Every person on this planet is a unique individual. There are no copies; no clones. Even twins are unique in their personalities, experiences, and futures. That can feel scary if the thoughts are dark, negative, or unwanted. But it’s also the key to amazing freedom. Mental independence is the reality that we all live in, whether or not we realize it. You are free to think I’m full of it for saying that, and I’m free to smile and nod.

it’s okay to look to others for what they think, but *never* take it at face value. Thinking for yourself means you take the extra step to do your own research, look objectively at things, and sometimes leave your feelings out of it. Mental independence leads to behavioral independence, which means you’re 100% in control of the actions you take, “Those who forget the past are condemned to repeat it.” The history of social movements has demonstrated the human desire for independence while the “portals of power” have always tried to make people dependent on the power structures.

Squeeze your over your irises, until the inner mirror fogs over, and say the word ‘Freedom’ what do you see? I see a keen bale upon bale cotton candy like sky, full of light, full of beauty, and unlimited potential like sky, it is unfailingly present like the sky and in forever need of watching. It changes each hour of each day and my slice of sky can grow black and thunderous even if it remains blue for another citizen. Yet the sky is comprised of every material and air of thin emotions and heavy clouding of independence waving like air all over it.

Emotional Independence Graph in millions since 1950 till 2019: -

Chapter 5 – The Future of Our Independent Nation

Time Ahead in future we'll be one of most Progressive nations in the world Competing for all the necessities and wants which will Glorify our Nation as a whole and will uphill us as humans, socially, economically as well as per recent reports A fourfold growth in 20 years. On PPP terms, the rise of the Indian GDP reflects an even more remarkable 500% growth. The next 40 years could see even more explosive growth. Several estimates are projecting that our GDP would range between 30 to 40 trillion USD by 2050, India is considered one of the potential superpowers of the world. This potential is attributed to several indicators, the primary ones being its demographic trends and a rapidly expanding economy and military. In India, FMCG is the most secure sector for long-term investment. The majority of the products in this industry have been in use for over a century and will continue to be used in the future as well. HUL, Dabur, Emmi, ITC, Nestle, and other FMCG companies are household names in India.

Our nation is also exceeding in terms of High-Profile Tech as India is now prepping for cutting-edge technologies including 5G, AI, blockchain, augmented reality & virtual reality, machine learning & deep learning, robots, natural language processing, According to National Association of Software and Service Companies (NASSCOM), the Indian IT industry's revenue touched US\$ 227 billion in FY22, a 15.5% YoY growth. According to Gartner estimates, IT spending in India is expected to increase to US\$ 101.8 billion in 2022 from an estimated US\$ 81.89 billion in 2021.

The Concatenation of Progress

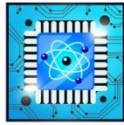

Future techs to launch in India: -

AUGMENTED REALITY

5D DATA STORAGE

QUANTUM COMPUTING

DIGITAL MEDICINE

SUPER BRAIN

ECOHOUSE

ARTIFICIAL INTELLIGENCE

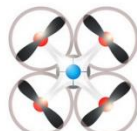

5G INTERNET

3D PRINTER

HOME ROBOT

DRONE TECHNOLOGY

VIRTUAL REALITY
HEADSET

ARTIFICIAL PHOTOSYNTHESIS

HOLOGRAM PROJECTOR

ELECTRIC CARS

EYE AUGMENTATION

CONCLUSION: Unsung Warriors Of and beyond Independence

To Encapsulate all in all a nation where people are united in all the Circumstances and who are Integrated no matter if it's to fight against any brutal force for Freedom to fight against any Physical, Mental Dependence or entity. It's a process that we all need to follow in order to free ourselves from the Grasps of the ones for 'Freedom' to "freedom". We as humans will go beyond and beyond everyone to Break all the cracks and deadlocks of Darkness in all forms. No shadow remains single , no light remains single ray and no one remains eternally locked against any ultimate force as its our natural instinct to Rebel for our rights.

NO ANONYMOUS REMAINS ONLY GHOSTS FOR US ALL THE UNSUNG HEROES WE REMEMBER YOU THROUGH THIS RESEARCH PAPER, CAUSE YOUR SACRFICE BLOSSOMED UPON US INFORM OF REAL INDEPENDENCE WHICH WE ARE SEEKING IN PRESENT. YOUR SOULS WILL FOREVER BE THE PART OF EACH PART OF OUR INDEPENDENCE FROM 1857 TILL 2022 FROM PHYSICALLY TO MENTALLY FROM EVOLUTIONARY TO REVOLUTIONARY FROM DRAINERY TO VISIONARY.
